

We'll begin with the event which took place on 2nd of May in Odessa. There was so-called "punitive action" against Ukrainians. Not less than 50 men were killed.

It was not so-called "punitive action". It was definitely the real punitive action, implemented against the people of Ukraine.

We sincerely mourn with the whole Ukraine and with Odessa. It is 'infinitely bitter for us that such events still came to the long-suffering land of Ukraine – in Odessa.

But we should understand these events, to avoid repeating mistakes, to reflect information aggression and for that such tragedies become impossible to happen again.

People sorted out the technical part of this event circumstantially enough: videos, photos, everybody's actions are minutely described. We will not consider it, we'll consider this event with another point of view. Namely with position of management, what has really happened and how it became possible.

Everybody who watches and sorts out these events are surprised with police officers behavior that's for sure. It would seem that every police officer, according to the "Law of Police", must use weapon without warning to defeat criminal if he witness the crime encroaching on life and health of citizen. Criminals were burning people alive in the House of Trade Unions, preventing firefighters to neutralize the fire. Police had done nothing! As well as in many other cases. In fact, among other things, police must interfere in all cases, if witnessed preparing for the crime. Production of Molotov's Cocktails, dismantlement the roadway for bricks - police officers saw everything, nevertheless they have done nothing at all. It is obviously that interaction between police and hitmen took place. What is the explanation of this interaction?

It is necessary to consider another event, to understand that. We'll be back to this, but first of all it is necessary to understand: the event in Odessa is not a special case, it was synchronized with events in Slavyansk where the active phase of war fight began and with conflict on Russian-Ukrainian border where nationalists under command of Djemilev tried to brake state boundary and committed wrongful acts (with Chubarov). That is to say the level of organization is very very high, that is to say events took place in different parts at the same time.

That's why considering another event is nessesary. On May 3rd learned that on May 2nd members of the "Right Sector" killed 10 civilians in village Andreevka. How that had happened? Video of witness tells that civilians delt with soldiers that they will expend their ammunition shooting in the air and then would leave. And while soldiers were doing it, 2 members of "Right Sector" and 5 foreign mercenaries came up..and it's even doesn't matter who and how many - political commissars came up. And these commissars began to shoot people. It is necessary to understand one thing here: none Ukrainian soldier did not have the honor, conscience and courage enough to protect people and shoot these killers. None of them aimed their guns at those who killed civilians. Why? Because the same mechanism had been triggered in Odessa and in Andreevka - blind obedience to orders. They thought " It's better to comply with the order, as it is better if something happens". A society that has an army and law enforcement like that - deeply morally ill, unfortunately, as it is necessary to regrettably admit. This is an extremely important thing.

Well, everyone, of course, is interested in question: "Where does this cruelty appeared from?" Why do men, or more precisely to say "sub men", kill their ideological opponents just because they have another opinion on smth. It happens due to an inferiority complex. Marginalization, the creation of the Ukrainian according to the Austrian General Staff plan – means marginalization of consciousness. So, the marginalization of consciousness leads to that a man begin to envy and hate the people around him. He does not want himself to work, to produce something by his own labor, to gain respect. But he hates people who are smarter, more efficient, capable and respected in society. They require an elite status for themselves, and to live at the expense of society. And now, in the prevailing moral parameters of society, if they come out with it and say "You must submit to us, for the simple reason that I want to be a master, I want you to be my slaves, you have NO rights at all, and only I have these rights, and in return, I will serve another ..." That is to say such kind of hierarchy – hierarchy of Chicken house. If they come out with these to people, the people would not understand and accept it.

If you say this directly.

Yes, if you say this directly. However, they want to be masters in the society, they want to humiliate, insult and suppress someone. Because to prove their own superiority and authority through they will do something good with their hands: become a good turner, doctor, engineer, invent something, write a novel and people would admire his talent – it's just impossible for them. They are aware of it for themselves internally, INTERNALLY. They will never tell it to the public. And in these circumstances, they are left with the only option. And if they enter into polemics with the person they will definitely lose. Therefore, they should not enter into polemics with people under any circumstances. Anyone who does not accept their diktat should die - that is the principle.

And according to that principle they provide themselves quasi pseudo "elite" status in society. Which does not need to work, and can only rule over "cattle" and that "cattle" will work for them. Second, they disorient and intimidate all the people who can represent any danger for them. Some of them begin to think that the way they behave – is the right one and join them; others – through the power, when you do not have an opportunity to object, they break through the power. And robbing others, they further improve their material status. That is what they are doing. That is important for them to have people working for them as cattle, which they manage. And to achieve this goal, they are ready to serve any political or military force, upon which they would be able to get people to obey them. From here, the Ukrainian nationalists cooperation with Hitler, from here their sincere service to the United States now, and right from here their active slogan. **«Наша влада повинна буде страшной»**. What is it about? "The authority must be DREADFULL". Do you understand? If it is not dreadfull, and if people will be able to have their own opinion and have an opportunity to express it, they will never be able to stay in power. To stay in power they need terror. Terror is necessary. And the worse will be the death of each person, the guaranteed they will settle fear in the hearts of people – that's the way THEY think. Were they successful when they tried to settle fear in the hearts of people during the Great Patriotic War? NO! All their atrocities people responded only one thing: the rebellion and total annihilation of fascist scum. The same thing will happen in Odessa. There is no other option. But they tend to kill all who do not agree to be their slaves, their cattle. And if earlier, before the events of May 2 in Odessa, the question of what power would be in Ukraine, which public order would be in Ukraine, was still debated, and there was something to talk about, after May 2 this question is closed. Authorities showed their real face. And this kind of order will be in Ukraine. That if miners do not want to go into the mine and work for free on these "conscious" there in Donbass or if workers do not want to operate the benches in Dnepropetrovsk and roach for free on them, there will be Punitive Squads of "Right Sector" entitled

" National Guard ". And they demonstrated it . However, being bastards inherently, moral and physical bastards - they want to look like "heroes". And from here "Ukraine above all". Constantly demanding lard for themselves, calling themselves "heroes". They need to "heroize" somehow. They need, due to these established parameters of social morality, to show people that they supposedly forced to act so brutally, they have to act that force, that they protect the people living here, the people who are forced to work on them, on these bastards. They seem to protect people from the most terrible force. And this terrible force, they have chosen, they found in the face Russia.

They are ready to serve Here, the hetman Doroshenko, he formulated that Ukraine should be sold to anyone, but not to Russia, because, otherwise, the Ukrainians will not survive. And he paid for Turkey and the Crimean Tatar Khanate with the people of Ukraine as slaves. And this all goes on. For them the people - it's trash, it's the cattle that they can move and pull back and forth.
